

OBE HETTICH S.L. EN COM, in order to fulfil its environmental commitment, has built a photovoltaic installation for self-consumption with a PEAK POWER of 113,2 Kw. Photovoltaic energy is a clean energy that does not produce greenhouse gas emissions and actively contributes to changing the energy model, making it more efficient and sustainable. This action has been carried out thanks to the public support of the European Union Funds with the acceptance of the "Next Generation" Fund. The aid amounts to 16,852 Euros.
